Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (currently amendment): Method for logging information during a call completion process in an Internet call waiting environment comprising the steps of:
* creating a service detail record (200)~~,~~; and
* ~~and~~ assigning a value to a parameter of the service detail record (200).

Claim 2 (currently amended): Method according to claim 1, whereby the value of said parameter of the service record (200) is based on call related information.

Claim 3 (currently amended): Method according to claim 2, whereby said call related information is an A-number (202), a B-number (203), an A-number presentation (204), or an originally dialed number (205).

Claim 4 (currently amended): Method according to claim 1, whereby the value of said parameter of the service record (200) is based on information relating to the call completion process.

Claim 5 (currently amended): Method according to claim 4, whereby said call completion related information is start of pop-up (206), start of outgoing call (207), status (208), choice (209), pop-up choice time (210) or time out (211).

1     Claim 6 (currently amended): Method according to ~~all of the~~
2     ~~preceding claims~~claim 1, whereby the service detail record
3     ~~(200)~~ is created at the beginning of the call completion
4     process.

1     Claim 7 (currently amended): Method according to claim 4, ~~5,~~
2     ~~or 6,~~ whereby a timer is started, and the value of said
3     timer is logged in the service detail record ~~(200)~~ on a
4     point of time during the call completion process.

1     Claim 8 (currently amended): Device for logging information
2     during a call completion process in an Internet call waiting
3     environment comprising means for:
4     • creating a service detail record ~~(200)~~; and
5     • assigning a value to a parameter of the service detail
6     record ~~(200)~~.

1     Claim 9 (original): Device for accessing via a network a
2     device for logging information during a call completion
3     process in an Internet call waiting environment.

1     Claim 10 (original): Device according claim 9, whereby said
2     network is a mobile network.

1     Claim 11 (original): Device according claim 9, whereby said
2     network is a fixed network.
